FARM AND GARDEN.

POULTRY YARD HINTS. A Few Reliable Health and Disease

When fowls are judiciously fed, made to take exercise, and their quarters kept clean and free from filth, there is comparatively no trouble with sickness, exept in cases of contagion.

When the combs and wattles of the fowls are of a bright red color, it indicates the condition of good health. When the fowls are busy scratching, the hens laying and singing, and the cocks crowing, these are signs of good

When you can enter the hen house after dark and hear no wheezing, it proves there are not any roupy fowls in the flock.

When the manure is hard, and a portion of it white, it indicates a healthy condition of the digestive organs. When the edge of the comb and wattles are a purplish red and the movements sluggish, there is something

wrong. When fowls lie around, indifferent to their surroundings, they are too fat, and death from apoplexy, indigestion or liver complaint will result unless the trouble is corrected.

When the fowls are restless and constantly picking their feathers, they are infested with vermin.

When young poultry, especially ducklings, appear to have a sore throat, and swallowing is difficult, it is the symptom of the large gray lice on the neck If the fowl has a bilious lock, with alternate attacks of dysentery and costiveness, it is suffering with liver complaint. A lack of grit, overfeeding and idleness will cause this trouble.

A hospital should be a part of every poultry yard. As soon as a fowl gets ill, remove it to the hospital and commence doctoring it at once. The trouble with far too many is that they wait un-Rome wasn't founded by Romeo; it was Juliet who was found dead by him.—Chicable fore giving medicine. A very sick fowl is difficult to cure, and when cured it is seldom of varue afterward.-Rural

SQUABS FOR MARKET.

How to Raise Them Successfully on the Poultry Farm. At this season squabs are very high

and frequently bring 50 cents each at profitable if permitted to fly at large. stroy them, but can be made to pay if board ship or in damp climates, and is kept in a suitable building with a wireovered yard. A house eight by 12 feet, ficient of leavening agents. Hence it is and a yard 100 feet long, 20 feet wide and 12 feet high, will serve for 20 pairs. The food should be wheat, bread, eracked corn, fresh meat (chopped), seed of any kind, finely-chopped grass should resist every attempt of the outand clover, ground bone, etc. A box of litter to palm off upon him any of the ground meat, one of ground bone and other brands of baking powder, for they one of pulverized charcoal should be will spoil and prove the cause of great kept conveniently for them, with fresh disappointment and trouble. water at all times. Put high and low roosts across the yards, and hang a salt codfish for them to pick at will. A The Feast Took Place 100 Miles From point in keeping pigeons is that the sexes must be equal, as an extra male will break up the matings. Only an City with a band of sheep last summer, when the birds are quiet. They must his flock for \$20,000. CHEAP BUT USEFUL.

A Comfortable Poultry House and Scratching Shed Combined.

The design of poultry house is one containing large windows to admit killed and sold 500, and received nearly plenty of light and heat during the day. \$20,000 for them. It may be of any size. A feature is the small and low shed, which is intended

COMBINATION HOUSE.

simply as a resort in the winter for scratching. It is made low, not only to cheapen the cost, but also because t is a better protection against winds han one that is higher. The shed has ground floor, and should contain envesoreut straw, into which a handful of millet seed should be thrown as an adacement for the hens to scratch. The roof and sides of both the house and shed may be covered with tarred paper or some similar roofing material, which will permit of the use of cheap umber in its construction.-Farm and

Reginning with Poultry.

A writer advises a beginner if he hat \$1,000 to put only half of it into the poultry business at first. We would advise him to start with little or no capitai- at most, very little. Get a few hers and batch the flock. One does not need costly henhouses, bone cutters, incubators and so on to start with. Many of the most profitable flocks have never seen anything of these luxuries. Most farm flocks are kept in the barn with the other stock, though shut away from it, and as to bone cutters, ste, no barn flock needs them. Woe unto the one who starts with a large capital. One of the strongest points in favor of poultry keeping is that it requires very lit tle capital.-Dakota Farmer.

How to Keep Chicks Healthy.

Charconi, crushed and ground oyster shells and stone grit should be kept in small shallow boxes where the chicks an help themselves. Feed often, but only what the chicks will eat up clean in say, five minutes, and keep the feed tray and drinking fountain as clean as soap and hot water (occasionally) can make them. The practice of dumping a lot of food down on the ground or on a dirty beard is poor economy. It will save time, but it will not save the chicks Keep the coop clean by thoroughly deaning it out every day and be sure there are no lice. - Agricultural Epito-

Seculent Feed for Hogs. The fact that a little grain fed to legs while at pasture will cause them grow rapidly, shows the advantage of some succulent food for the pigs' rations. Only a small proportion of its food should be of this character, for succulency generally means large bulk with small nutritive value. In winter there is no better supplement to the grain ration than beets. They are both succulent and sweet, and are much cavier to digest than the raw potato, whose earbonneeous putrition is in the

ARE YOU TO LIVE IN ALASKA? Some Requirements That Will Be Found Indispensable.

The universal article of diet in that country, depended upon and indispensable, is bread or biscuit. And tomake the bread and biscuit, either in the camp or upon the trail, yeast cannot be used-it must be baking powder; and the powder manufactured by the process; s of the Royal Baking Powder Company, miners and prospectors have learned, is the only one which will stand in that peculiar climate of cold and dampness and raise the bread and biscuit satisfac-

These facts are very important for every one proposing to go to Alaska and the Yukon country to know, for should he be persuaded by some outfitter to take one of the cheap brands of baking powder, it will cost just as much to transport it, and then when he opens it for use, after all his labor in packing it over the long and difficult routs, he will find a solid caked mass or a lot of spoiled powder, with no strength and useless. Such a mistake might lead to the most serious results. Alaska is no place in which to experiment in food, or try to economize with your stomach. For use in such a climate, and under the trying and fatiguing conditions of life and labor in that country, everything must be the best and most useful, and above all it is imperative that all food supplies shall have perfect keeping qualities. It is absurd to convey over such difficult and expensive routes an article that will deteriorate in transit, or that will be found when required for use to have lost a great part of its value.

There is no better guide to follow in these matters than the advice of those who have gone through similar experience. Mr. McQuesten, who iscalled "the father of Alaska," after an experience of years upon the trail, in the camp, and in the use of every kind of supply, says: "We find in Alaska that the importance of a proper kind of baking powder cannot be overestimated. A miner with a can of bad baking powder is almost helpless in Alaska. We have tried all down to use nothing but Royal. It is stronger, and carries further, but, above all things, it is the only powder that will endure the severe climatic

changes of the Arctic region." It is for the same reasons that the U. "I was troubled with eruptions on my retail. The wholesale price ranges from S. Government in its relief expeditions, face. I thought I would give Hood's Sur \$2.50 to four dollars a dozen. A pair of and Peary, the famous Arctic traveler, saparilla a trial, and after taking a few pigeons will produce from six to ten have carried the Royal Baking Powder

BIRDS EAT 400 SHEEP.

Jack Collins, who started for Dawson spert can tell the cocks from the hens has been heard from. He sold part of

> of the arctic zone. This is how it happened: He drove the sheep in over the Dalton trail. Some time before Dawson was reached cold weather came on, and Collins decided to kill his sheep. He

Then he concluded to hold the remainder for a better market. He killed the remaining 400 in a sort of secluded place off the line of travel and suspended the carcasses on poles far enough above the ground to be out of the reach of bears, wolves or other wild animals He left two young men to watch the mutton, and proceeded to look for a mining section. Having found one, he located a claim and proceeded to test

it. After he had dug out a few thousand dollars' worth of gold he thought he would, as the French say, "return to his muttons."

His stay had been so prolonged that the young men had become weary of holding a wake over the sheep, and imagining Dawson to be only a few to enjoy some of the pleasures a met ropolitan city can afford. It proved to Western Plowman. e about 100 miles to Dawson, so their absence was more extended than they had inended, and when Collins reached the place where he had left the car casses of 400 sheep he found only 400

bleaching skeletons. The engles, ravens, crows, kites, hawks and other birds of prey which inhabit that region had been feasting on mutton. "Where the carenss is, there will the eagles be gathered," is a proverb which applies to other birds of prey. Collins had left so many carcasses that invitations had been sent out and a general round-up of all the vultures and things in that region, from Behring sea to the Mackenzie river, had taken place, Whether the claim Collins secured will make good the loss of the mutton or not remains to be seen. but when he drives in his next band of cheep the birds of prey will not get so large a percentage of them .- Portland Oregonian.

RUBBER AND EVENER.

Good Implement for Preparing Land

for Seeding. In preparing land for corn culture he land rubber illustrated berewith may be made at home at but small cost and will prove to be an effective implement. It consists of six pieces of four by four scantling, seven feet long, loosely bolted by the corners. Three bolts are in each piece, an eye in each

ING.

to hold each piece of scantling rigid One bolt is placed in the center; the others one foot from each end. Chains from the outer bolts of the front scant ling are brought together and serve as a place of attachment for the whif fletree. The front cutting edges on each scantling are protected and their efficiency aided by having them bound with flat iron two inches wide and onequarter inch thick. This size rubber is found to be heavy enough and well adapted for ordinary work, but if made of pine or any light wood it will require weighting .- S. N. Cox, in Farm and

TANNING FUR SKINS. An Operation Requiring Some Care

and Experience.

Soak the skins until soft, remove su perfluous flesh and soak in tepid soft water one hour. For each skin make a solution of one-half ounce of borax. three-quarters ounce saltpeter and onehalf ounce globular salt. Disselve or sorts, and have been obliged to settle moisten with soft water sufficient to spread on the flesh side of the skin. Put on with a brush, taking into consideration the varying thicknesses of skin and apply accordingly. Keep in a moderately cool place for 24 hours, wher the skin is to be washed clean. Then take one ounce sal soda, one-half ounce borax and two ounces hard soap, melt together, taking care not to bring to a boil. Apply the heated mixture to the flesh side and keep in a warm place for 24 hours. Wash the skins clean and apply two ounces saleratus, three and finally by rubbing the flesh with sandpaper or pumice stone.-G. H. Hap good, in Farm and Home.

AGRICULTURAL NOTES.

Cultivate the corn before it is up. Get the implements ready for spring work.

Clover will run out the common Alfalfa is not satisfactory in the middle west.

On poor soil sow wheat a little thicker than on good. Orchard, timothy, blue grass and

clover make a good pasture. Wire fencing is so cheap that there is no excuse for lack of fences, Fermenting and heating in the mow

are what make clover hay dusty. just as good an absorbent as plaster. all the stock you can keep, will bring the time, and their minutes usually up a worn-out farm.

If the land is level three inches of fine pulverization of the soil is believed to be best for conservation of moisture. There is a very general opinion among

eorn growers with whom we talk that we plant too thickly for best results. Old straw stacks may be spread on the pastures in spring to advantage. It is a mulch and prevents too close crop-

If cattle are turned on topped dressed pasture before the grass gets a good miles away, had started for that city start and before there has been a good rain, it will be offensive to them .-

The Use of Fertilizers.

You cannot, by the use of commercial fertilizers alone, make your land rich. Indeed, if they are ignorantly applied, the result will be the impoverishment of the soil. If you add ten dollars to your bank account and check out \$20, you know the result. In like manner, when you use a small quant'ty of your fertilizer, it grows a vigorous plant, which enables it to gather fertility from the soil largely in excess of the materials added by the fertilizer. Judiciously used, they are a great boon to the farmer. But, I repeat, the best method of using the phosphates and potash salts is on the pea and clover crops. It insures, as a rule, a fine erop of these renovators. - Southern States Farm Magazine.

Ashes with Stable Manure.

It may seem strange to advise applying wood ashes unleached to stable manure just before it is plowed under. world that is used to connect two parts | Yet this is often a good thing to do. of a town is the one in Heligoiand, the While exposed to the air, especially if little island just off the coast of and be- the manure be wet so as to leach the ashes, there will be some loss of amthe town is on a cliff over 200 feet high. | monia. But so fast as the manure and ashes are turned under this waste of ammonia ceases. The ashes cause the manure to ferment rapidly, and in contions between the two portions of this | tact with the soil none of the ammonia will be lost. In fact, much of it will combine with the potash in the ashes, forming a nitrate of potash, which is the scene of its daily labors .- N. Y. the most effective manure known .-American Cultivator.

Modern Agricultural Training.

Education in all branches of farmng will in the future be universal. Europe has dairy schools, and short courses in agriculture are being given at nearly all of the experiment stations in this country. The khode Island station now has a poultry department, in which pupils are taught the merits and characteristics of the breeds, fowl anclation at Bath in praise of corsets de- atomy, diseases, artificial incubation clared that "reasonably tight" lacing and the brooding of chicks, chemistry

Chronic Rheumatism.

From the Industrial News, Jackson, Mich. The subject of this sketch is fifty-six years The subject of this sketch is fifty six years of age, and actively engaged in farming. When seventeen years old he hurt his shoulder and a few years after commenced to have rheumatic pains in it. On taking a slight cold or the least strain, sometimes without any apparent cause whatever, the trouble would start and he would suffer the

most excruciating pains.

He suffered for over thirty years, and the bolts are in each piece, an eye in each end of the bolts and so connected as not was unable to do any work. To this the frequent occurrences of dizzy spells were added, making him almost a helpless invalid.

IN ALL SORTS OF WEATHER. He tried the best physicians but without eing benefited and has used several specific About one year and six months ago he read in this paper of a case somewhat similar to his which was cured by Dr. Williams' Pink Pills and concluded to try this remedy.

After taking the first box he felt somewhat better, and after using three boxes, the pains entirely disappeared, the dizziness left him, and he has now for over a year been entirely free from all his former trouble and enjoys better health than he has had since his boyhood.

He is loud in his praise of Dr. Williams' Pink Pills for Pale People and will gladly corroborate the above statements. His post office address is Lorenzo Neeley, Horton, Jackson County, Michigan.

All the elements necessary to give new After taking the first box he felt some

Knew His Business.

"My dear, why are you applauding that piece!" asked Mrs. Snaggs, in a tone of reconstrance. "Don't you see no one else applauding? It is beyond the performer's ability and not worthy of applause."
"I know that," replied Mr. Snaggs, "but we must applaud pieces like that in order to get something worth listening to in the encore."—Pittsburgh Chronicle.

It is not nearly always the richest people Who have the finest horse and buggy.-Washington Democrat.

The young onion is a very seductive veg-stable, but it invariably gives a man away. - Chicago Daily News.

MORNING CALLS.

Are Often a Nuisance to the Busy

Housekeeper. There are few things more aggravat ing to a busy housekeeper who has quarts hot soft water, four ounces alum but one servant or possibly no servant quarts hot soft water, four ounces alum and eight ounces sait. Dissolve in than the interruption of her work durbandling without scalding the bare hand allow the skin to remain in this mixture for 12 hours. Afterward wring support the servant or possibly no servant than the interruption of her work durbandling without scalding the bare hand allow the skin to remain in this mixture for 12 hours. Afterward wring support and floods the soil, which consists of a rich black porous loam, fed by the deciduous foliage of the oak trees. This peculiar soil but one servant or possibly no servant and floods the soil, which consists of a rich black porous loam, fed by the deciduous foliage of the oak trees. This peculiar soil bat when the sail with mineral sails for ages, is an soluble as sugar, and being devoid of clay is not sticky in the least. It is not, therefore, in any sense related to the conventional much out the moisture and allow 12 hours to every housekeeper, and should not be dry. Finish by pulling and working laterrupted by callers. Most women who have housework to do, and the care of a family, however busy they are in the morning, sit down in the afternoon with their sewing and are glad to see company at that time. The rooms have now been set at rights, and the heaviest meal of the day is usually over. Sensible women, in case of untimely

Hers do not stane invite their callers into the kitchen or wherever their work leads them, and go on with it. The person who assumes intimacy enough to make a morning call on a busy housewife cannot expeet her visit to be considered ceremoniously. It requires some courage to invite a visitor, who says she has only stopped for a moment, into the kitchen, but there are occasions when nothing else can be done. The character of the individual must be taken into Black loam earth, in a dry state, it consideration. Some visitors do really stop a moment. There are certain vis-Clover, clover and more clover with iters who come merely to while away mean hours. It will not do to spend the valuable morning without work in their society. It may be that they will be offended, though no sensible woman should be. It matters little is comparison with the mischief they will accomplish if allowed to use up the valuable time which should be devoted to the work of morning, and turn the system of the house topsy-turvy. When t becomes known that a housekeeper s too much occupied in the morning, and cannot sit down with a caller, sensible women will limit their visits to afternoon. Callers come because the housewife sits down to receive them. and does not go on with her work or excuse herself. It is simply thought essuess that causes the morning call, which so often tries the patience of the systematic country bousekeeper and sets her work awry for the day, with all the train of evils which follow, n delayed meals, unswept rooms and general discord and disarrangement .-N. Y. Tribune.

HE WORKED A CLEVER GAME. The Young Lady Clerk Would Not

Take an Infected Nickel. Out in the western part of town is a neat little bakery, behind the counter of which presides a trim and tidy maid. A tramp came into the shop a few days ago. The weather wasn't very cold, still he shivered and trembled.

"A loaf of bread, please, mum," he stammered, putting a nickel on the ounter and keeping his hand danger-The girl lifted a loaf from the shelf,

rapped it in paper and handed it to im. As he took it he looked at her with an agonized expression in his face. "Would you please tell me, mum, where the nearest hospital is?" he gasped.

"Why, are you sick?" queried the bakery maid, compassionately. "I believe I am! They have been having the diphtheria where I live, and I

must be getting it right now!" "Get out of this place!" shrieked the frightened girl. "How dare you come in here? Here, take your dirty money!" "All right, mum," said the tramp, submissively, shambling out with his hand clutching his throat. At the nearest corner a brother tramp

waited his coming. "Did it work, Bill?" he asked. "To perfection, Bluffer! Here is the onf and the nickel is right down there

in my pocket."-St. Louis Republic. Sweet Potato Pie. One pound of steamed sweet potatoe finely mashed, two cupfuls of sugar one cupful of cream, one-half cupful o butter, and three well-beaten eggs are required. Flavor with lemon or nu meg, and bake in a pastry shell. This

A TOOTH-BRUSH TALE. Old Story and One That Is Brane

Three society girls sat in the newly decorated boudoir of the blue-eyed girl. The prown-eyed girl remarked that she wished some one would remind her to buy a toothbrush the next time she went downtown. Then she laughingly asked:

brush the next time she went downtown. Then she laughingly asked:

"Girls, what would you call a toothbrush—one of the amenities of civilization?"

"I would call it a necessity," exclaimed the blue-eyed girl. "That reminds me, girls," she continued, "of a story my Uncle James used to tell. I always had my doubts about this story of Uncle James', but I will tell you what he said.

"He was going from Boston to New York one time on one of the new Sound steamers, and he shared his stateroom with a strange man. When morning came, Uncle James got up first, dressed, and went on deck. Presently he came back to pack his traveling bag. He remembered that he had left his toothbrush on the rack. On looking for it, he discovered his roommate using it vigorously. Supposing that a mistake had been made, he said:

"I beg your pardon, sir, but that is my I beg your pardon, sir, but that is my

toothbrush.

"'Indeed,' said the man, 'you must excuse me; I thought it belonged to the boat."

"Oh! oh! oh!" exclaimed the gray-eyed girl, waving her hands frantically, "that is the same story my Uncle Robert always told. It didn't happen to either one of them of course."

them, of course."
"Of course not," assented the blue-eyed girl, laughing. "We have caught both our uncles in fibs now, haven't we?"
The brown-eyed girl looked at her frineds in disgust .- St. Louis Republic An Old War-Horse of Journalism Dis-

covers the Virtue of a New Medicinal Variety.

There are only a few of them left. Since Chas. A. Dana's death, Joseph Me-ill, the war-horse of the Chicago Tribune, in, the war-horse of the Chicago Tribune, is the chief surviving representative of the ld school of virile, aggressive editorial

To have mud thrown at them was part of the profession at all times, but to find health in mud is rather a modern innovation. That is what Joseph Medill has been doing of

Mr. Medill is an investigator and when the stories of the miraculous Magno-Mud at Indiana Mineral Springs began to spread over the country, the great editor became interested and eventually decided to try this mysterious substance on his own rheumatic mysterious substance on his own rheumatic limbs and weigh its value. He was accom-panied by his private physician, a young Armenian scientist of high attainments. The great editor was mud-mummified daily for several weeks and gained visibly in

for several weeks and gained visibly in weight, strength and vitality.

The final result of the experiment was an unqualified success. Mr. Medill went back to Chicago in September, and wrote an editorial about Magno-Mud with his own hand. Next, he sent his son-in-law for a little of the mud-treatment. In November he went down again, and since the new bath house is completed he expects to be a regular visitor four times a year.

This mud-treatment in which Mr. Medill found so much virtue, is peculiar, yet logical. After all, every form of hife springs from the earth, which is the great destroyer and assim-

After all, every form of his springs from the earth, which is the great destroyer and assimilator of dead and effete matter. At the Indiana Mineral Springs is a beautiful little natural amphitheatre, the slopes being grown with magnificent oaks. At the foot of the converging hills, a big Lithia spring gushes forth at the rate of 3,000 barrels a day in any sense related to the conventional mud
of the road-way, of the Chicago street or to
the variety which clings to your heels.

The mud is applied to the patient on a cot,
the subject being entirely encased in the
substance, steamed to a proper temperature.
It then acts as a poultice, stimulates the
skin, superficial blood vessels and nerves,
corners the reares and lithium the blood disopens the pores and lithiates the blood, dis-solving all uric acid deposits. Nothing can be simpler or more rational.

Some people read only their church pa-pers.—Washington Democrat.

Pres. McKinley Vs. Free Silver. A battle of giants is going to take place this summer on 30,000 farms in America, not in talk or votes, but in yields. Salzer's her potato marvels are named as above, and he offers a price for the biggest potato yield, also \$400 in gold for suitable name for his corn [17 fisches long] and out prodigies. Only seedsmen in America growing grasses, clovers and farm seeds and selling potatoes at \$1.50 a barrel. THE MAN WHO LIVED.

He should have been dead.

But he wasn't, because-

"There's nothing succeeds like success."
There is no withstanding the living argument of the man who should be dead, who isn't dead, but who would be dead, but for isn't dead, but who would be dead, but for a preserving medicine. That's about the way it seemed to strike Editor Lawrence, of the Ohio Farmer, Cleveland, Ohio. He was afficted with one of those colds that have, thousands of times over, culminated in consumption, when not promptly cured. In this condition he met a friend, a consumptive, whom he had not espected to see alive. The consumptive friend recommended Dr. J. C. Ayer's Cherry Pectoral for the editor's cold, on the ground that it had "helped him wonderfully," It helped the editor just as wonderfully, giving "almost instant relief." But read his letter:

one of the man who should be dead, who isn't dead, but who would be dead, but for a preserving medicine. That's about the way it seemed to strike Editor Lawrence, of the Ohio Farmer, Cleveland, Ohio. He was afflicted with one of those colds that have, thousands of times over, culiminated in consumption, when not promptly cured. In this condition he met a friend, a consumptive, whom he had not expected to see alive. The consumptive friend recommended Dr. J. C. Aver's Cherry Pectoral for the editor's cold, on the ground that it had "helped him wonderfully." It helped the editor just as wonderfully, giving "almost instant relief." But read his letter:

"About two months ago, I was afflicted with a bad cold, and, meeting a friend, he advised the use of Aver's Cherry Pectoral which, he claimed, had helped him wonderfully. As he was a consumptive, whom I had not expected to see alive for several years, I concluded there must be merit in this preparation. I accordingly bought a couple of bottles, one of which I keep on my desk all the time. This is certainly the best remedy for a cold I ever used. It gives almost instant relief, and the J. C. Ayer Co. are to be congratulated on posses-
